Design and Production of Measurements or Tests Benches

Since 2003, AdvEOTec carries out measurements, tests and expertises on optoelectronic components and systems, from evaluation to the complete qualification of these systems.

AdvEOTec also is an engineering office which design and build benches and instruments from your specifications.

OPTICAL, ELECTRICAL, MECHANICAL AND THERMAL DESIGN

ADVANCED TEC SOFTWARE ENGINEERING

QUALIFICATION AND SYSTEM VALIDATION

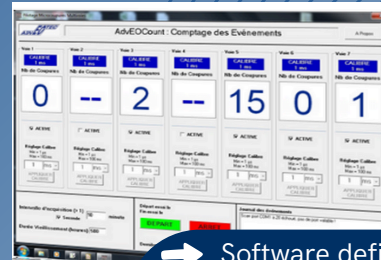

- Modelling and design
- Bill of material (BOM)
- Evaluation of technological risks

PROCUREMENT AND CONTROL

- Equipment procurement with verification and control
- Selection and follow-up of suppliers and subcontractors

- Software definition
- Acquisition and data processing
- Automatizing standard equipment : sources, motors, sensors, TEC

PRODUCTION, ASSEMBLY, INSTALLATION AND SET UP

- Integration of the complete system
- Programming and automation
- Manufacture and validation of subsystems
- Development of dedicated optical measurement and test systems

- Metrological validation
- Procedure validation

TRAINING AND IMPLEMENTATION

- Manufacturing files
- Specific packaging
- Training and implementation assistance
- Maintenance program
