

HTS TESTS

High temperature storage

DESCRIPTION

AdvEOTec has a heat chambers park, located in Electrostatic Discharge Protected Area (EDPA).

Our equipment enables us to carry out your high-temperature resistance from ambient to 300°C.

These high-temperature storage tests are part of the range of services at **AdvEOTec**.

High temperature storage chamber

Types of components :

- Electrical connectors
- Optical connectors
- Laser diodes, imagers, photodetectors
- Others...

According to standards such as :

- GR 468
- GR 1209
- GR 1221
- MIL-STD-750
- MIL-STD-810
- MIL-STD-883
- Others...

Specifications :

Heat chamber :	
Volume :	40 L
Temperature range :	From ambient to 300°C

Some tests also available :

- RTC : Rapid temperature change
- HCH : Thermal cycling in temperature
- STC : Slow temperature change
- LTS : Low temperature storage
- TS : Thermal shocks tests

**Other test configurations, contact us...*
